Summary

Recent Computer Science graduate and full-stack developer crafting effective and visually appealing experiences. Proficient in modern JavaScript frameworks and cloud technologies. Committed to clean code and continuous learning.

Education

Frederick University — 2020-2024
Computer Science — Engineering
3.8
🔗 Frederick

Projects

Harmony — Feb 2023-Sep 2023
Collaborative Note Management
🔗 Harmony

Developed SaaS document management platform with real-time collaboration, AI-powered features (text completion, summarization), and tiered subscriptions for teams. Github

NextJS, ReactJS, Typescript, TailwindCSS, Convex, OpenAI

ProfitScan — July 2024-Present
Financial Analysis
🔗 ProfitScan

Financial analysis tool (in development) designed to allocate expenses, generate P&L accounts, and provide customizable reports. Aims to help businesses track profitability across different segments. (Private repository)

Python

Experience

Panaline — June 2023-June 2024
Full Stack Developer — Limassol

I created a tool for businesses to manage and examine the financial data to find where and how their expenses are allocated through a dynamic, interactive dashboard. Users can apply expense allocation rules to examine their profit based on those rules.

Skills

HTML	CSS	Javascript
NodeJS	Typescript	ReactJS
NextJS	TailwindCSS	Python

Certifications

Joy Of React — August 2024
Josh Comeau
🔗 Joy Of React

Completed the "Joy of React" course by Josh Comeau, gaining knowledge of React's core concepts and advanced techniques. This program covered state management, hooks, performance optimization, and modern React patterns.
